

NEW PRODUCT

Luxury Look... STAIR TREADS

MILL FINISH EACH	LENGTH	PRICE
	.9 mtr.	\$115
	1.0 mtr.	\$125
	1.2 mtr.	\$130
	1.8 mtr.	\$146
	2.4 mtr.	\$169

Manufactured from High Quality Extruded Aluminium in a Mill Finish.

Standard sizes available in: 900, 1000, 1200, 1800 and 2400mm.
Can also be cut to any length you require.

Has a Work Load Limit of 470 kg with a maximum span at 1200mm.

Dimensions: 250mm wide x 50mm high.

Supplied with 4 x 10mm hex bolts, nuts and washers to bolt to stringers.

Slotted groove for adjustable fixing position.
Non slip ribbed grooves on top and side surfaces for a safer grip area.

All treads completed with 2 cast alloy end caps. Each cap is secured by 2 large hidden rivets.

MULTI AWARD WINNING PRODUCT

PLANK CLAMP *Plank Magic*

AS SEEN ON TV

PLANK CLAMP JAW SIZES

For ALUMINIUM PLANKS, clamp should be dismantled then reassembled with aluminium raised portion turned to the side.

For HYPLANK LVL 40 mm PLANKS, clamp should be dismantled then reassembled with aluminium raised portion turned to the top.

SETTING A FIXED SIZE

In cases where the jaw size can remain fixed on a set size, the end of the threaded rod should be burred to prevent the locking handle becoming detached from the clamp.

The clamp can be used to clamp multiples of two, three or four planks to form a working platform. All platforms shall comply with the requirements of the latest edition of The Australian/New Zealand Standard, AS/NZS1576.1.

PLATFORM DUTY	LIGHT	MEDIUM
Min Platform Width	450mm	900mm
Min. Number Planks	Two (2)	Four (4)
Max. Point Load	100 kg	150 kg
Max. Total Load (per platform span) AS/NZS1576.1	225kg	450 kg

When clamped together with a single clamp at midspan, the scaffold planks forming either Light or Medium Duty platforms, or ones with three planks wide, may be supported at the following maximum span positions.

STANDARD PLANK LENGTH & TYPE	MAXIMUM PLATFORM SPANS & OVERHANG FOR LIGHT OR MEDIUM DUTY PLATFORMS
6.0 m Aluminium Planks	— 5500 mm Span and 250 mm Overhang
Hyplank LVL Planks (40 mm thick)	— 3400 mm Span and 250 mm Overhang

NOTE:-
a) These spans are based on two supports only per platform plank length.
b) Should longer standard plank lengths be used, three supports evenly spaced will be necessary, with lesser spans than those specified herewith.
c) These spans are suitable for three plank width platforms with maximum point and total loads of 125 kg and 325 kg, respectively.

- 2 Plank Model - \$75 each
- 3 Plank Model - \$80 each
- 4 Plank Model - \$85 each

...feels like a dance floor.

A GREAT NEW CONCEPT IN PLANK SAFETY.
Our new plank clamp solves the problems associated with trip-lip conditions, while working on two or more planks.

Plank Magic not only proves to be safe, but it can also halve the sag, double the strength of the planks and also improves the slide grip of planks to between 29% and 80%.

- Robust aluminium construction
- 2 Plank model weighs 2.4 kg
- Feel and work safer • Work faster

PROVEN SAFETY ASPECTS OF OUR UNIQUE SYSTEM AFTER 16 YEARS OF FEEDBACK

Out-Riggers are unavailable for the following reasons. Wherever there is sufficient space to stand up the trestle the counterweights can be used. Our experience with thousands of customers who use the trestle systems, suggest that they prefer to use the counterweights. However, those who have used the outriggers complain that there are many circumstances where they just don't work, with the result that workers are unnecessarily exposed to higher risk.

- Where there is a lack of space such as in the housing industry, particularly with small lot housing.
- Where the ground is too soft to properly support the outrigger, this common cosmetic approach to stability is a potential trap.
- Where there is a steep embankment, sloping either toward or away from the Trestle System is another common scenario.

In practice outriggers are often not installed correctly giving the operators a false sense of security and is not practical in circumstances such as the following:
Alternatively, counterweights that are cheap to purchase, unattractive to the thief while very quick and easy to install, make a more positive contribution to the practicability and stability of the system. We agree with our engineer's opinion that "a stability system that is more likely to be used is an inherently safer system".

It is also worth noting that this system has been in widespread use now for a number of years and soon after it was launched, won us the Business of the Year 1999 Queensland Health & Safety award. The system has continued to win other awards for our company, of which we here at Tommy Tucker Trestles are very proud.

"PACKAGES DO NOT INCLUDE TRESTLES, PLANKS & CLAMPS"

PACKAGE A. SINGLE BAY SYSTEM

2 x MASTER POSTS (Fits all models)	\$240.00
2 x SPREADER BARS	\$215.00
3 x TELESCOPIC HANDRAILS (3.3m to 6.250m)	\$345.00
2 x STOP ENDS	\$ 80.00
4 x COUNTERWEIGHTS (Galvanised)	\$220.00
TOTAL PRICE	\$1,100.00

Please add one PLANK CLAMP - if you don't yet own one.
\$75.00 Each

The REGULATIONS stipulate that the full system above must be used and not part there-of.

PACKAGE B. 2 BAY SYSTEM

3 x MASTER POSTS (Fits all models)	\$360.00
3 x SPREADER BARS	\$322.50
6 x TELESCOPIC HANDRAILS (3.3m to 6.250m)	\$690.00
2 x STOP ENDS	\$ 80.00
6 x COUNTERWEIGHTS (Galvanised)	\$330.00
TOTAL PRICE	\$1,782.50

Please add two PLANK CLAMPS - if you don't yet own any.
\$75.00 Each

Saw Bench Weight Just 15kg

ADJUSTS TO SUIT ALL MODELS

TO WIDEN YOUR EXTENSION
Clamp on a widening block for wide jobs only.
Position widening block where required.

AS SEEN ON TV

Tradesperson's now have access to a professional Drop-Saw Work Bench that is simple and quick to set up, fully adjustable, extremely stable and accurate with every cut... another "Tommy Tucker" innovation.

The robust aluminium stop is adjustable up to 2.95 metres from the saw blade, when using the extension.

An extra fence can be obtained in any position on top of the bench, by clamping an additional "Stop" upside down under the bench top. The tongue will protrude the bench top by 30 millimetres.

A 2.2 metre simple self-locking extension is optional and can be fitted to either end of the bench. The extension has a folding leg and is slotted for precise height adjustment.

When two extensions are fitted (one to each end of the bench), the total overall length of the bench top is 6 metres.

A tradesperson working with several different models of saws can interchange with minimal adjustment by following these quick tips:

- purchase one additional platform for each saw type;
- use spacer blocks or bolt sleeves to obtain a uniform height between the bottom of the platform and the top of the saw table.

Interchanging of saws or with other tools can be performed in just seconds by removing four wing nuts.

- Bench Tested to 1 Tonne
- Fits all Drop Saws
- Adjustable Height

TOMMY TUCKER GUARANTEES YOUR MONEY BACK IF THE TRADE QUALITY HEAVY DUTY ALUMINIUM DROP-SAW WORK BENCH IS UNSUITABLE FOR YOUR SAW MODEL.

BASIC PACKAGE

TOTAL PRICE - \$645.00
Price includes:

- 1 x SAW BENCH

DROP-SAW WORK BENCH - SET-UP INSTRUCTIONS

- Fold out both legs of the Saw Bench into the fully open position.
- Saw Bench must be positioned on a flat level surface.
- Fit Platform.
- Place the Drop-Saw on top of the aluminium Platform.
- Adjust the height of the Platform by turning the four Nylock nuts provided so as the saw table is level with the channel top.
- Align the fence of the saw with the outer edge of the 150mm wide saw bench channel top by using a straight edge.
- Drill at least 2 x 10mm holes through the base of the Drop-Saw and through the aluminium Platform.
- To bolt the Drop-Saw down, use at least 2 x 10mm hex bolts with Nylock nuts and tighten.
- To secure the Platform to the Bench use one wing nut on each of the four height adjusting rods.

The work bench is suitable for left or right handed operators and will improve your work flow and productivity.
